Applicant's arguments against all of the outstanding rejections have been found persuasive. Accordingly all previous rejections of record are withdrawn.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marsden '082 or Degnan et. al '071.

Marsden teaches a method of making an olefin polymerization catalyst from a cogel of silica and at least one other metal oxide. The method includes aqueous hydrogel and catalytic amounts of alkali metal ions, mineral acid and activating. The specific teaching of magnesia is found at column 4 line 61. The other teachings are found at the abstract, column 3 line 39 et. seq and in the claims of the reference.

Degnan teaches a method of making a catalyst composition from a hydrogel at a basic pH containing alkali and alkaline earth metal cations, aluminum oxide and silicon oxide. These teachings are found at column 2 line 1 et. seq and in the claims of the reference.

Each of the references fails to teach the specific use of an impregnation step with the alkali metal or alkaline earth metal components.

The specific teaching of impregnation of the silica with the alkali metal or alkaline earth metal components is an inherent feature found in both references. The teaching of the presence of alkali metal in the silica is noted in claim 10 of

Marsden. Degnan teaches at column 1 the presence of alkali or alkaline earth metal in the catalyst. Thus the instant claimed invention is obvious from the teachings of the two references.
